Alma Dal Co School on Pattern Formation in Biological Systems Across Scales

Venice, Italy, 12-17 September, 2027

An interdisciplinary week of science on pattern formation across biological systems

Studying pattern formation involves methods of observation and modelling that span across disciplines: biochemistry, molecular biology, physics, informatics, ecology, and evolution. The highly interactive format fosters exchange among participants and across disciplines and career stages, inspiring early career researchers to pursue groundbreaking research in the spirit of Alma Dal Co's passion for knowledge, innovation, and multidisciplinary study.

APPLICATION deadline
January 31st 2027
